

Mitex International (Hong Kong) Ltd.
Environmental Policy

1. We shall comply with laws, regulations and other requirements related to environmental conservation.
2. We shall consider the environmental impacts of our business activities and promote the following efforts toward environmental conservation.
 - a. We shall strive to improve energy efficiency by maintenance checks of facilities, equipment and vehicles, use of various energy saving devices, etc.
 - b. We shall promote proper recycling of waste.
 - c. We shall make efforts to save energy and resources, reduce waste generation and prioritize buying and using Eco Mark products.
 - d. We shall strive to continually improve our environmental management system through a grasp of the status of our environmental conservation efforts and by creating, promoting and reviewing our activity plan with improvement targets.
3. We shall strive to improve all Mitex HK employees' understanding and awareness of environmental conservation and provide support through environmental education activities to enable each employee to voluntarily make efforts toward environmental conservation.
4. We shall disclose this environmental policy widely to the public by posting on websites.
